

## INDEX

No.	Program Name	Page No	Sign
1	Design a Registration form Default.aspx page with fields Username, choose password, confirm password, age, email id, mobilenno and a submit button.  Use:  a) RequiredFieldValidator - for Username b) CompareValidator - for Confirm password field. c) RangeValidator - for Age field. d) d) RegularExpressionValidator - for Email field. e) CustomValidator - for mobile no field.		
2	Write a program to perform to design a simple calculator to perform addition, subtraction, multiplication and division.		
3	Design a user interface to print the result student with total marks and percentage.		
4	Write a program Day of the Date.		
5	Create a Database “DbStudent”. Create following table. tbl_student (stud_id, stud_rollno, stud_name, stud_class, stud_department)  <ul style="list-style-type: none"><li>• Write a simple program to demonstrate Insertion of data into database.</li><li>• Write a program to show recodes in GridView Control.</li><li>• Write a program to print the Student Name and Student Class based on the Student Department (Search Functionality).</li><li>• Write a program to update student record.</li><li>• Write a program to delete particular student record.</li></ul>		

1. Design a Registration form Default.aspx page with fields Username, choose password, confirm password, age, email id, mobilenno and a submit button.

Use:

- f) RequiredFieldValidator - for Username
- g) CompareValidator - for Confirm password field.
- h) RangeValidator - for Age field. d)
- i) RegularExpressionValidator - for Email field.
- j) CustomValidator - for mobile no field.
